Miles from Home while Her Dinner Cooks

on a new Clock Controlled Natural Gas Range

At the time she has set, the clock on her automatic natural gas range will turn on the oven and top burners. She may choose any or all burners for use, and adjust each one to the exact heat she desires for cooking. The automatic oven heat regulator will keep oven temperature constant at the point selected. At any time set, heat will be turned off by the clock.

Oven insulation conserves fuel and keeps the kitchen cooler. And cooking with natural gas costs as little as a quarter of a cent a person a meal.

See the new natural gas ranges in the display of your dealer or gas company, and be sure to look for the Blue Star Seal of the American Gas Association Testing Laboratory.
